## BI View Builder for Odoo

Diego Luis Neto, Odoo Development Manager @ Onestein BV

- Introduction
- Business need
- Idea
- Opportunities
- Challenges
- Demo time
- Roadmap
- Q&A

**“Above all else ...  
... show the data”**

Edward Tufte in “The Visual Display of Quantitative Information”

## Using Odoo

- Data is in the system
- Power-user **knows what** he wants and **where** to find it
- **Great tool** for data analysis and presentation

**BUT**

**Always SW Development required!**

Integrated tool to

- **Graphically define** your analysis data-set
- Add new **computed information** to your data set
- Specify the **visualization attributes**

**Create the basis for a new data exploration method in Odoo**

## No more “Users VS Developers”

More freedom for the users...

More **challenging activities** for developers!

## No more **external tools** for data analysis

Reporting information **centralization**

**Less software to maintain**

**More simple infrastructure**

# Challenges

Make it

- **Working**
- **Integrated (BE and FE side)**
- **Abstract**
- **Dynamic**
- **Easy and Friendly**

**SHOW TIME**

# Roadmap

**ONESTEIN**

- **07/2015 Beta** release of a base version
  - ✓ Fully CRUD custom reports
  - ✓ Customizable BI Views
- **09/2015 Stable** release
  - ✓ All Completed Beta features
  - ✓ Improved UX
- **Soon**
  - ✓ **Custom** fields management
  - ✓ **Advanced query features** (Built-In functions, custom filters, ...)
  - ✓ **Onestein Business Apps** integration
- **Later**
  - ✓ **Graph view** for table relations
  - ✓ **Mindmap** exploration widget
  - ✓ ...

# Q&A
