Introduction

*“ My small corner shop is growing
and I am looking for a modern
point of sales solution. Why should
I go for the Odoo POS application? ”*

Jean-Paul T., my local bookseller

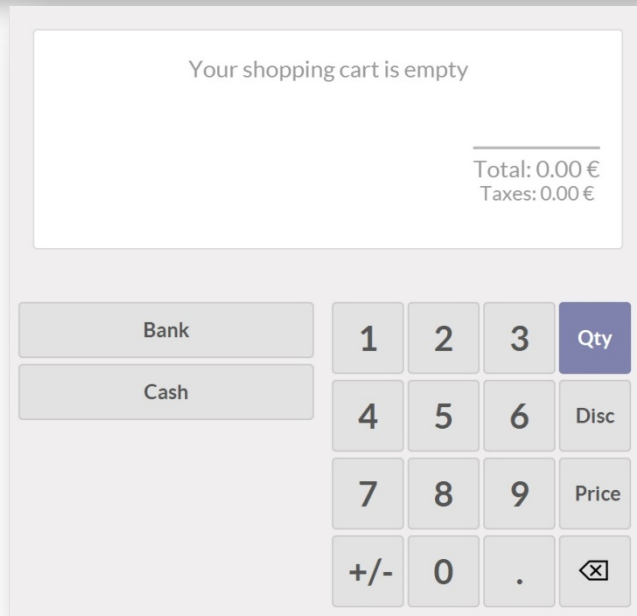

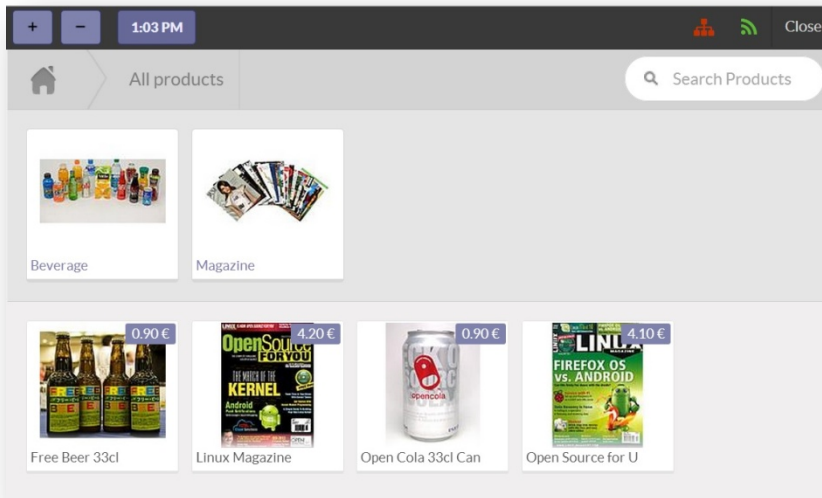

Traditional point of sales solutions have several stumbling blocks

- Setting up the software and learning how to use it is often **complex**
- Setting up the **hardware** needs to be done by a **technician**
- **No link** with other applications such as inventory, accounting or measurement tools

Advantages

A very friendly Point of Sale

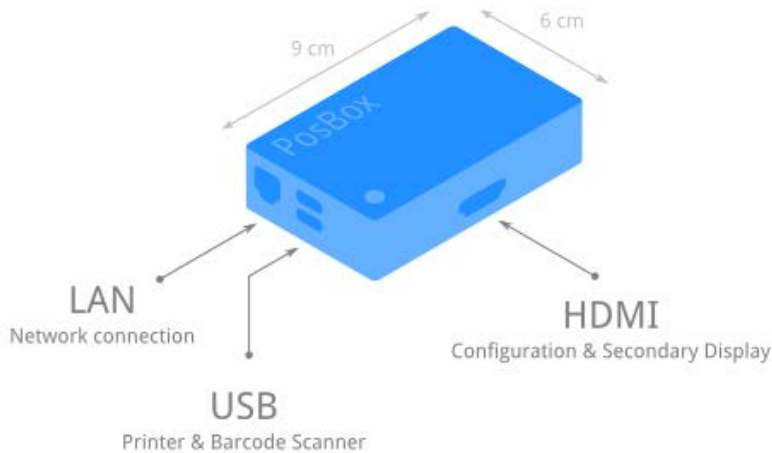

- Intuitive user interface
- Online and offline mode
- Out-of-the-box compatibility with your existing devices
- Full integration with other apps such as Warehouse Management or Accounting
- Advanced statistics

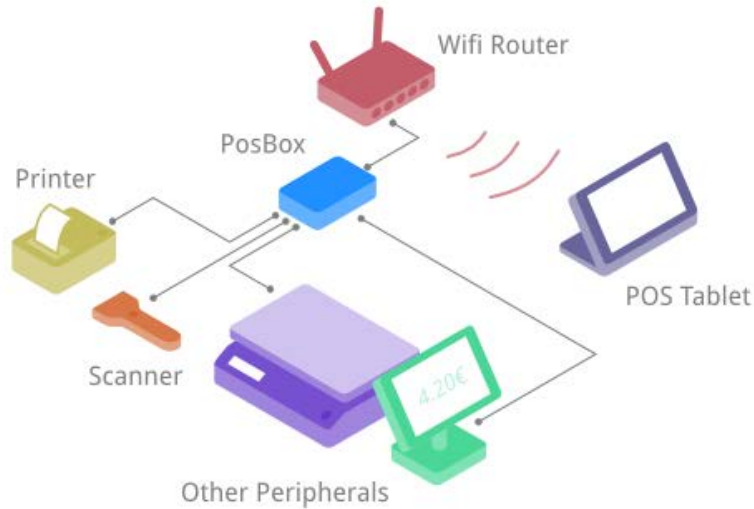

The PosBox

A wireless access to your existing peripherals

- Little hardware box based on a Raspberry-Pi that will handle all the peripherals' drivers and setup very easily
- Crowdfunding campaign to make the Pos compatible with a maximum of devices
- Wireless access to your peripherals

The PosBox: advantages

- Plug and play solution
- Use of USB peripherals with wireless POS tablets
- Wireless support lets you move around your shop freely with your POS tablet
- Bringing cost down (instead of bundles offered by traditional operators)

Demonstration

- **Easy set-up** of the point of sales application
- Creation of various **products** to be sold in the POS
- Common Use Cases
 - **Creation** of a ticket
 - **Modification** of the ticket
 - Register a payment via **several payment methods**
 - Creation of **several tickets** at a time in a restaurant
 - Creation of an **invoice** for a B2B client
 - **Refund** a ticket because of a defective object
- **Strong integration** of the POS with other Odoo applications
- Making sense of the data collected: **reporting**

odoo

Conclusion

- Quick to configure
- Easy to use
- Affordable and evolving solution

Thank You
